Hi Carmen,

Yes, we received concurrence from Nathan on the proposed sampling back in September 2015 (please see attached emails). After we received EPA concurrence, the work plan was submitted to UPR on December 15, 2015.

Also, the draft LUCs were email to EPA and DTSC on October 12, 2016 (South) and January 18, 2017 (North) along with our response to Nathan's comments. I'll forward the emails with the revised LUC's and response to comments next.

Please let us know if you need any additional information or if you want to setup a call to discuss anything.

Thank you, Linda

Hello Kim,

Thank you for the news regarding the sampling at the railroad spur. Did EPA approve the sampling plan? I believe that my colleague, Nathan Dadap, was working on the project at that time. Please confirm if EPA approved the plan.

Also, on another related topic, I would like to get the status of the land use covenants for the different parcels. Nathan Dadap left EPA when the land use covenants were being developed. For Parcels affected by PCBs, the land use covenants needed to be reviewed by EPA before finalization and recordation.

I look forward to your call or email.

Thank you for your courtesies.

Best,  
Carmen

Yes, I have attached the work plan that was submitted to DTSC, EPA, and UPRR on December 15, 2015. We have been working with UPRR over approximately the last 18 months to get access to the property.

Kim

Good morning,

I would like to update you on the status of our proposed soil sampling on the UPRR segment adjacent to the Former Pechiney Cast Plate Facility in Vernon, CA. We have been provided access to the property by the Union Pacific Railroad to conduct the work and made the required notifications to the various railroad departments. We currently have the work scheduled to be conducted on June 15, 2017. We anticipate the sampling will take one day to complete. Please let me know if you have any questions.

Kim
